

SOUTH JORDAN CITY WATER SHARE LEASING GUIDELINES

1. Water share leasing requests will be taken from January to March.
2. Each request will be numbered as it is received.
3. Priority will be given to previous leasers. If demand exceeds the amount of shares owned by the City, a drawing will be held.
4. Payment must be received in full at the time of leasing.
5. Ten percent (10%) of water shares from each canal company are held in reserve by South Jordan City.
6. The cost of leasing shares varies per canal company.
7. Confirmation letters will be sent out as payments are received.
8. **Any request received after March 9th will be allowed only if leaser has the permission of the canal company IN WRITING.**
9. South Jordan City will notify the canal company. Leaser should also contact the canal company to receive and ensure weir and watering assignments. If water will be pumped from the ditch an application must be submitted through the Canal Company.
10. Access to water through private systems not located on the lessee's property requires the written permission of the ditchmaster or property-owner before shares will be leased.
11. Leaser is responsible for the maintenance of the ditch on their property.
